

Boligorla Lokesh

Full Stack & AI Developer Intern

✉ lokeshboligorla77@gmail.com ☎ +91-8247834425

Summary

Detail-oriented Full Stack Developer with a strong focus on building ethical AI-driven web applications and responsive user interfaces. Proficient in modern frontend frameworks like Next.js and React, complemented by solid backend fundamentals in Node.js and Express. Experienced in integrating Large Language Models (LLMs) and utilizing AI-enhanced development tools like GitHub Copilot to accelerate delivery and maintain high code quality. Committed to developing scalable, cloud-hosted solutions on platforms such as Google Cloud Platform (GCP) and Vercel. Passionate about creating health-focused technology that emphasizes transparency, security by design, and user-centric logic.

EDUCATION

Jawaharlal Nehru Technological University Hyderabad (JNTUH) | Bachelor of Technology in Engineering – Computer Science and Engineering-(Data Science) | Aug 2022 - May 2026

Pallavi Engineering College, Hyderabad, Telangana

Work Experience

Freelance Web Developer || 2025 - Present

Hyderabad, Telangana

- Developed responsive full stack web applications using React and Node.js to meet diverse client requirements.
- Implemented smart UI flows and dashboards focusing on intuitive navigation and ethical data visualization.
- Built scalable backend services and API integrations to support dynamic frontend components and real-time updates.
- Optimized application performance and loading speeds by refining asset delivery and database query structures.
- Collaborated with stakeholders to gather technical requirements and iteratively improve feature sets for better usability.
- Delivered clear documentation for deployment and handoff of web applications hosted on Vercel and Render.

AI Developer | VISWAM.AI (IIIT Hyderabad Initiative) | May 2025 - Present

Hyderabad, Telangana

- Contributed to AI-driven web applications by building modular frontend components with Next.js and Tailwind CSS.
- Supported the integration of Large Language Models (LLMs) to create intelligent reporting and compliance tools.
- Designed and structured component-based UI systems to visualize complex AI data for end-users effectively.
- Applied prompt engineering and AI-enhanced development tools like GitHub Copilot to improve application logic.
- Participated in the deployment and monitoring of cloud-hosted applications on Google Cloud Platform (GCP).
- Tested and debugged code to ensure high standards of security, accessibility, and cross-browser performance.

Technical Skills

Frontend Development:

Next.js, React.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend & Database:

Node.js, Express, MySQL, API Integration, Firebase, RESTful APIs

AI & Productivity:

GitHub Copilot, Cursor, Replit, Langchain, Prompt Engineering, ChatGPT API

Cloud & Deployment:

Google Cloud Platform (GCP), Vercel, Render, Git, GitHub

Development Tools:

Visual Studio Code, NPM, Postman, Figma, Linux Basics

Professional Virtues:

Ethical AI Design, Problem Solving, Team Collaboration, Agile Development, Technical Documentation

PROJECTS

SkillMate – AI Learning Assistant

• Built an AI-powered learning platform with Next.js focusing on intuitive LLM-based user interactions. • Created structured UI flows to guide student engagement with dynamic, AI-generated educational content. • Implemented responsive layouts using Tailwind CSS to ensure seamless accessibility across all mobile and desktop devices. • Collaborated on backend integration to stream learning data efficiently to the primary frontend dashboard. • Improved system performance by optimizing component rendering and reducing script execution time. • Wrote technical documentation for frontend and AI logic to support collaborative development and future maintenance.

AI-Powered Web Applications

• Designed and implemented full stack web interfaces integrated with complex AI backend services and APIs. • Built reusable UI components with Tailwind CSS to maintain design consistency across multiple dashboard modules. • Optimized web platform loading speeds to ensure a responsive user experience for data-heavy applications. • Supported the integration of AI-enhanced features by preparing interface logic and smart data visualizations. • Participated in iterative testing and debugging to fix functional bugs and improve overall application stability. • Deployed and managed web applications on

Vercel and Render using continuous integration and version control.

CERTIFICATIONS & TRAINING

Responsive Web Design

freeCodeCamp

Python Essentials 1

Cisco Networking Academy

Introduction to Cybersecurity

Cisco Networking Academy

Prompt Engineering

Infosys Springboard

Bootstrap 5 Framework

Online Certification Platform

KEY ACHIEVEMENTS

Project Contributions

• Contributed to production-oriented AI and web projects under a structured organizational setup for health-tech. • Assisted in the successful delivery of full stack features for client-facing and internal web applications. • Participated in team code reviews to maintain high quality, scalability, and consistency across projects. • Supported the implementation of modern UI/UX practices in all project-based work to improve user engagement. • Gained practical experience in using Git and GitHub for version control in high-speed collaborative environments. • Delivered functional web components that met or exceeded technical specifications and security standards.

Technical Implementation

• Demonstrated ability to bridge UI design intent with technical implementation through clear logic and communication. • Translated Figma designs into clean, semantic HTML and CSS for various full stack web projects. • Improved existing user interfaces by applying modern styling, Tailwind CSS, and performance optimizations. • Supported the alignment of frontend components with Node.js and Express backend API requirements. • Created documentation to assist other developers in understanding custom interface logic and AI integration steps. • Maintained a high standard of code quality while meeting tight project deadlines for strategic deliverables.

Professional Development

• Maintained a consistent focus on learning modern full stack practices alongside AI-enhanced development workflows. • Completed multiple certifications to strengthen proficiency in React, Python, and Responsive Web Design. • Applied new technical skills to improve the functionality and ethics of ongoing academic and professional projects. • Participated in workshops and training sessions focused on LLM integration and smart UI flows in web dev. • Stayed updated with the latest trends in cloud deployment and web performance optimization techniques. • Integrated advanced CSS frameworks and AI APIs into project workflows to increase overall development efficiency.

Portfolio Development

• Developed an active portfolio showcasing academic and project-based work focused on AI and Full Stack development. • Built custom web components that demonstrate proficiency in Next.js, React.js, and JavaScript (ES6+). • Showcased the ability to create responsive and accessible web platforms for diverse use cases and domains. • Documented project workflows to highlight problem-solving skills, technical contributions, and ethical design choices. • Optimized portfolio website performance to demonstrate practical application of optimization and cloud hosting skills. • Regularly updated portfolio content to reflect the latest technical achievements, certifications, and skills.
